Follow the directions, conditions and precautions on the packaging. They are based on the product's characteristics and recommended applications. Use this product according to good practice, bearing in mind the above and, under your own responsibility, any and all particular factors which may come into play and which are beyond our control (equipment used, application conditions, mixed products, and so on). The manufacturer guarantees the quality of its products sold in their original packaging and that it has been granted authorisation to market them.

Ready-to-use preparation 8g/Liter

Use inside buildings

- Insect Barrier is an effective treatment against crawling insects (ants, fleas, bedbugs, spiders) and flying insects (flies, mosquitoes, moths, etc.) on surfaces inside buildings, residential spaces, dwellings and other structures.
- Insect Barrier is also useful in treating industrial warehouses.

Authorisation from the Health and Safety Executive GB and UK

N° 7397 valid until mai 2010

Authorisations from the French Ministry of Agriculture for specific uses:

- *Authorisation No. 8000 288: insect control in storage rooms, transport equipment facilities and industrial processing facilities (POA)*

- *Authorisation No. 8000 376: insect control in garbage collection equipment (chutes), hauling equipment and disposal facilities as well as communal areas of buildings, ducts and basements.*

Use and dosage :

- Insect Barrier is a ready-to-use surface insecticide. It can be sprayed as many times as needed whenever its effects lessen.
- Hold bottle 30 cm away from surface to be treated and spray in a crisscross pattern.

RECOMMENDATION: USE 1 LITRE PER 20 TO 30 SQUARE METRES OF SURFACE TO BE TREATED.

- **CRAWLING INSECTS :** Floors, door and window frames, insides of furniture and equipment.
- **FLYING INSECTS:** Net curtains, curtains, draperies, rugs, carpets, unfinished Wood, plasterwork, masonry, flat paint .

Frequency of treatment:

- Insect Barrier lasts for 3 to 6 months depending on its exposure to light and UV rays, which degrade it. Always repeat treatment after cleaning a treated surface.

Labelling:

Insect Barrier G1P is classified as dangerous for the environment (N).
R50/53: very toxic to aquatic organisms;
May cause long-term adverse effects in the aquatic environment

Precautions for use:

- S2: keep out of the reach of children.
 - S13: keep away from food, drink and animal feedingstuffs.
 - S20/21: When using do not eat or drink.
 - S28: after contact with skin, wash immediately with plenty of soap.
 - S29/35: do not empty into drains; this material and its container must be disposed of in a safe way.
- In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible);
Keep only in the original packaging.
Before using this product on any surface, it is recommended to always test a hidden area to ensure compatibility.
Do not use on clothing worn by children under 3 years old.

Container:

- ½ litre, 1 litre or 5 litre plastic bottle.
